### General Market Insight

#### **Market Growth**

- According to Semiconductor Industry Association (SIA), the global industry sales in January 2023 reached USD 41.2 Billion, down of about 5.2% from a total of 43.6% Billion in December 2022 and as compared to January 2022 sales in this industry, it is down of about 18.5%.
- About 70% of market growth in the global semiconductor market is driven by the automotive, computation and data storage and wireless industries.
- Leaders are optimistic about revenue growth in this industry. About 81% of the survey that KPMG conducted responded that they project their company's revenue will grow over the coming year though they are slightly less bullish on industry revenue growth. About 41% percent are concerned that the Russia-Ukraine war will materially impact industry revenue growth this year. However, when KPMG and the GSA conducted a pulse survey in May 2022, only 25 percent had this concern.

#### **US CHIPS Act**

- The Biden administration unveiled rules this February for its "CHIPS for America" program to build up semiconductor research and manufacturing in the United States. The CHIPS act is foremost about national security but will try to advance other priorities as well.
- US' CHIPS Act spurs growing concerns among enterprises. Based on Chinese experts, the latest push by the US in chip sector, in which Washington was asking subsidy recipients under so-called CHIPS act and investment restrictions in China was widely viewed as a move of US targeting China.
- Tri-country dialogue between US, Japan, and Korea to cut off chips to China is an expansion of the trilateral
  cooperation among Indo-Pacific partners that previously focused largely on the North Korean nuclear threat.
  The forum seeks to build unified front with partners to restrict sales of advanced semiconductor manufacturing
  equipment to China.

#### Semiconductor Industry

- South Korea's chip industry is facing shortage of skilled employees which is already struggling due to the
  repercussions of the global economic slump. The supply of new talents for the industry, including those who
  graduated from both formal and vocational schools remains low at about 5,000 per year according to Korea
  Bizzwire.
- The plans for U.S modular nuclear power reactor received a push as some Western U.S. cities vote to move ahead with novel nuclear power plant despite the bump in projected costs.
- Ransomware attack on US-based chip supplier MKS Instruments causes delays for semiconductor groups and would cost about USD 200mn in lost or delayed sales that might continue until March 2023.

### General Market Insight

- A survey conducted on March 1 showed Asia's factory activity stalled last month, as slowing global demand, stubbornly high inflation and the fallout from past interest rate hikes weighed on the region's economies with the exception of China.
- South Korea's imports of Silicon wafers from China have continue to grow, while South Korea's imports of silicon wafers from Japan have declined in the past three years.
- China is by far the largest silicon producer followed by Russia, Brazil, and Norway.
- Asia-Pacific semiconductor demands make up the bulk of global demand followed by Europe and US regions, respectively.
- Japan will consider lifting the export measures to South Korea after assessing the country's administration plan to resolve the wartime labour row to improve ties.
- Singapore is the Chipmakers and related suppliers' target hub to increase their production in order to meet the growth demand in the medium to long term and spread their supply chain risks.
- Domestic producers in Japan are boosting investments and accelerating development of back-end technologies for semiconductor manufacturing.
- EU CHIPS act aims to increase semiconductor production in EU region. In February 2023, Chips Joint undertaking, an investment tool whose objective is to support the growth of the sector was adopted to promote EU leadership in this field in the mid to long term.
- The average lead times for the most standard semiconductors is 26 to 52 weeks. Most of the high-end components are in allocation with average lead-times of 52 to 78 weeks.
- SEMICON West is set to open at Phoenix Convention Centre in 2025. For the first time in 50 years, the valley will
  host the largest semiconductor conference in North America.
- TSMC invested USD 40 Billion in the construction of its semiconductor factory in Arizona.
- Foxconn Technology plans to build second chip plant in India, independently.

#### **Analog Devices**

- Analog Devices announced that the company has joined the Association of Musical Electronics Industry (AMEI), an organization that standardizes, manages, and promotes the MIDITM standard of musical data communication in Japan.
- Analog Devices introduced a precision medium bandwidth signal chain platform improving system performance for signal
  bandwidths of DC to approximately 500kHz towards industrial and instrumentation applications. The new platform offers a host of
  complete signal chains with customizable solution options and a curated suite of development tools, such as LTspice® simulations, to
  simplify the design journey.

#### **Bourns**

- Bourns Resistor Product Line continues to broaden its portfolio of high power, surface mount thick film chip resistors by introducing new model CRM-Q, CRS-QCMP-Q, and CHP-Q series thick film chip resistors.
- The company released the highest current carrying bidirectional Power Transient Voltage Suppressor (PTVS) diode series that is available in a compact surface mount DFN package.

#### Broadcom

- Broadcom's acquisition of VMware last May 2022 was extended this year with a 90-day extension due to regulatory issues. They are aiming to seal the transaction until the end of this fiscal year in October 2023.
- The company listed new products HSMH-H170, MegaRAID 9540-2M2, ASMB-MTBO-OB3A2, HSME-CA83, ASMB-MTB1-OB3A2, and HSMC-CO20

#### Diodes Inc.

- Diodes Inc. announced the new DIODES™ ZXMS81045SPQ, its first protected, automotive-compliant, high-side IntelliFET™ and it first Silicon Carbide (SiC) Schottky barrier diodes (SBD).
- The company launched their latest linear current LED driver, the DIODES™ AL5887. that addresses RGB and Single-color Solid-state lighting.

#### Infineon

- Infineon Technologies AG and TrustSEC have joined forces to launch BIO-SLCOS, a smart cards operating system utilizing Infineon's latest SLC38 Secure Element to strengthen biometric smart card security.
- Infineon received the approval from German government to start construction of its new fab in Dresden, Germany. The company
  plans to invest a total of USD 5.5 million in the new Dresden plant which is expected to start producing analog/mixed-signal chips
  and power semiconductors in fall 2026.

#### Intel

• Intel's in-development 3nm CPU products will land in 2024.

#### Kyocera

- Kyocera targets sustainability though plastic-free packaging for knives that will be exhibited in Frankfurt am Main at the Ambiente Trade Fair in February 2023.
- The company plans to build a new manufacturing plant in Isahaya City, Nagasaki, Japan with approximately 150,000 sqm area by 2026.

#### Lattice

- Lattice expands ORAN Solution stack with Precision timing and secure synchronization support for 5G+ network infrastructure.
- New Lattice Avant™ FPGA platform has been named a 2023 BIG Innovation Awards winner in the product category for its leadership power efficiency, performance, and small form factor.

#### Micron

- Micron Technology, Inc. announced that they are participating at Susquehanna's Twelfth Annual Technology Conference in March 2, 2023.
- Micron DDR5 memory delivers up to twice the memory bandwidth over previous generations.
- New Micron 9400 SSD delivers best-in-class performance and capacity and is now available from channel partners and to global OEM customers for use in servers requiring the highest levels of storage performance.

#### Molex

 Molex elevates electrical safety in Harsh environments with launch of first portable, IP69K-Rated super safeway Ground Fault Circuit Interrupter (GFCI). The new GFCI offering is the highest level of industrial protection against penetration of high pressure, high temperature water and dust.

#### Murata

- Murata, in collaboration with longstanding systems integration partner Sentinum, has made a major announcement that will further progress the widespread automation of crop production.
- The company announced second generation LTE-M/NB-IoT module, the Type2GD it is the first solution on the market that offers
  ultra-low power and multiple LPWA communication protocols including non-terrestrial networks (NTN) satellite connectivity
  support in a single system-on-chip (SoC) package.

#### Nexpria

Nexperia strongly condemns the illegal invasion of Ukraine by Russia. According to the company, they comply with international
sanctions, which they fully support, therefore, they have no Russian customers and do not sell to Russia even through distributors.
Nexperia has never been involved in projects of military nature and has no intention of doing so in the future stated in their press
release.

#### NXP

 NXP unveils EdgeLockSE051H, a single chip solution with integrated NFC designed to improve security and matter device user experience

#### Nordic

- Nordic Semiconductor company announced availability of nRF7002 companion IC and nRF7002 development kit, enabling developers to easily create innovative, low power Wi-Fi 6 IoT applications.
- The Lilbit smart wearable employs Nordic's nRF9160 SiP and nRF52811 SoC to track pet location and health metrics

#### Onsemi

- Onsemi's acquisition of East Fish Kill fab create onsemi's largest U.S. manufacturing site.
- · EFK enables accelerated growth and differentiation for onsemi's power, analog and sensing technologies

#### **Panasonic**

- Panasonic introduces LUMIX S5IIX and LUMIX S5II mirrorless cameras with Hybrid Phase Detection AF system, enhanced Active I.S. and newly developed 24-megapixel full-frame CMOS sensor.
- The company opens senior housing community in China called Yada Panasonic Community in Jiangsu province that offers 1,170 units.

#### Samsung

- New CV3-AD685 System-on-Chip advances Autonomous and Advanced Driver Assistance System (ADAS) applications, providing single-chip solution for multi-sensor fusion and path planning
- has established a Life Cycle Assessment (LCA) on the product carbon footprint of its semiconductor business and achieved verification from DNV, one of the world's leading independent certification bodies.
- Samsung's crisis resilience receives global recognition with the ISO 22301 certification, the international standard for business continuity management

#### Siemens

• Siemens AG's spin-out of its motors and drives business would result in a wholly owned subsidiary named Innomotics and would be largely complete by October 1.

#### Silicon Labs

• Silicon Labs grows revenue 46% year-on-year in third quarter of 2022 across both its Industrial & Commercial, and Home & Life businesses.

#### **TDK**

TDK offers industry's highest rated current multilayer chip bead for automotive power supply lines -- MPZ2520SPH Series
multilayer chip.

#### **Texas Instruments**

- · Texas Instruments will build a new USD 11 Billion 300-milliliter semiconductor wafer fabrication plant in Lehi, Utah.
- Teledyne e2v Provides a Highly-integrated Radiation-tolerant DDR4 Memory Solution with Texas Instruments Power Supply
- TI identified a potential issue that makes the potentially affected material subject to SIEP.

#### Toshiba

- Toshiba's \$15B buyout deal in trouble, foreign investors might drop.
- The company's newly Launched gate-driver IC for automotive brushless DC motors helps improve safety of electrical components.
